Short Film

solo for 5 octave marimba

Drew Morris

When showing this solo to a friend, he told me it sounded like it belonged in an animated short film, which is where the title can e from.

Short Film is a great solo to develop the 1-3-2-4 croe giation pattern in addition to rhythmic independence and a few non-standard time signatures.

There is also a 4.3 octave ve sion available at www.drewmorrismusic.com
